Publications in this annual statistical series are:

Section 1 — SUMMARY (in preparation)

Section 2 — ENROLLMENT (January 1973)

Section 3 — PARTICIPATING PROVIDERS (in preparation)

Section 4 — INPATIENT CARE (in preparation)
- 4.1: Short-stay Hospital Utilization
- 4.2: Short-stay Hospitals—Diagnoses and Procedures
- 4.3: Psychiatric Hospital Utilization
- 4.4: Long-stay Hospital Utilization
- 4.5: Extended-Care Facility Utilization

Section 5 — OUTPATIENT HOSPITAL SERVICES (in preparation)

Section 6 — HOME HEALTH SERVICES (in preparation)

Section 7 — PHYSICIANS' AND OTHER MEDICAL SERVICES (in preparation)

Persons on the ORS health insurance mailing list will be notified when the various sections are available for purchase through the Superintendent of Documents, U.S. Government Printing Office.

Foreword

WITH THE enactment of the health insurance program for the aged (Medicare), it became possible for the first time to organize a continuing information system to report the use of health care services by older Americans. Since Medicare began, one of the basic tasks has been to process and pay claims for covered medical services submitted by or on behalf of all aged persons who are entitled to hospital insurance benefits and those voluntarily enrolled for supplementary medical insurance benefits. From this operation come data on the amount, kind, and cost of medical services used by the aged.

This report is one of a series of publications designed to disseminate such data on a regular basis. It provides detailed statistical information on the characteristics of persons insured under Medicare. The series includes other reports on the number and characteristics of participating providers and on the utilization of medical care services. A listing of these reports appears on the inside cover. The reports are intended to give a comprehensive account of the amounts reimbursed under the program, the kinds of services paid for, and the variations in utilization and reimbursement by age, race, and sex of the beneficiary, as well as his place of geographic residence. Such data can provide new insights into the patterns of medical care for persons 65 contribute to improved health services not only for the aged but for the general population as well.

Many individuals in the Social Security Administration have assisted with the development of this series. The preparation of the reports is a function of the Division of Health Insurance Studies of the Office of Research and Statistics under the supervision of Howard West, Director, and Aaron Krute, Deputy Director. Important contributions for the tabulation and presentation of the statistical content of this report were made by Theodosia P. Rasberry and Robert J. Butler of the Statistical Processing and Procedures Branch and Joyce B. Ragin of the Program Statistics Branch of that division. Text preparation was the responsibility of Kathleen B. Schock and Martin Ruther of the Program Statistics Branch. Special acknowledgments for computer services are made to the Division of Health Insurance Statistical Data, Bureau of Data Processing.

The general tables were produced by the "System for Automated Tabular Composition", a computer system at the Social Security Administration headquarters in Baltimore, Maryland. They were photoset on Linotron equipment at the Government Printing Office in Washington, D.C.

Notes		2-1
2.1	Persons enrolled as of July 1, for health insurance, by type of coverage, age, race, sex, region, division, and State of residence	2-2
2.2	Persons enrolled as of July 1, for health insurance, by type of coverage, age, region, division, and metropolitan-nonmetropolitan residence	2-19
2.3	Persons enrolled as of July 1, for health insurance, by type of coverage, State, Puerto Rico, Virgin Islands, metropolitan-nonmetropolitan residence, and county	2-21
2.4	Persons enrolled as of July 1, for health insurance, by type of coverage, race, sex, population size groups of standard metropolitan statistical areas, and each area of 500,000 or more in 1970	2-44
2.5	Persons enrolled for health insurance, by type of coverage, age, race, sex, and month of coverage	2-46
2.6	All persons ever enrolled during 1970 for hospital and/or medical insurance, by age, race, sex, region, division, and State of residence	2-51

THIS PUBLICATION is a section of a statistical report series produced from Medicare program records. Presented on a calendar year basis, describing services rendered in the year, the series includes sections on enrollment, characteristics of providers, inpatient care in hospitals and extended care facilities, outpatient hospital services, home health services, physicians' and other medical services, and overall summaries.

The primary objective of these reports is to provide data required to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, extended care facilities, home health agencies, and independent laboratories to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the program services utilized and the demographic characteristics of each individual recorded in the health insurance entitlement master file.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available data. First, data are collected and maintained on an individual basis so that the beneficiary and his medical experience under the program form the basic unit. Second, records for each bill paid under the program and, for a sample of beneficiaries, records of diagnoses and surgical procedures are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are centrally prepared.

THE BASIC RECORDS

The statistical system is based on five related computer-tape records: the health insurance entitlement master file, provider record, hospital insurance (Part A) utilization record, medical insurance (Part B) payment record, and the record containing information from medical insurance bills for a 5-percent sample of supplementary medical insurance enrollees.

THE HEALTH INSURANCE ENTITLEMENT MASTER FILE

The health insurance entitlement master file identifies each aged person eligible for health insurance benefits and indicates whether he is entitled to hospital benefits, to supplementary medical insurance benefits, or to both of these benefits.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program and therefore serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, extended care facility, and independent laboratory must apply for participation in the hospital insurance program in order to be reimbursed for services provided. Data included on the application forms have been recorded in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him under the "benefit period" concept.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration for recording in the central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days remaining during the "benefit period."

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When approval for payment has been made, the intermediary forwards the claim to the Social Se-

curity Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures are coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Copies of admission and billing forms are handled in a comparable manner by home health agencies and extended care facilities. The outpatient billing form is also transmitted to the Social Security Administration for recording in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and extended care facilities that is needed to administer the "benefit period" provision is recorded in the central record. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or extended care facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting tape record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to Part A utilization.

PAYMENT FOR MEDICAL INSURANCE

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills having allowed charges exceeding $50 during a calendar year period.

For the insured population, carriers need to know from a central source that the deductible has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable record of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

The payment record also contains selected items of information needed to supply an efficient basis for drawing samples of the bills. These items provide a sampling frame that may be used to draw additional samples designed to obtain specific information not furnished reliably by the basic sample of enrolled persons under the medical insurance program.

THE MEDICAL INSURANCE SAMPLE

Although the payment record provides a rapid method for summarizing payment data and a sampling frame for efficiently drawing additional samples of bills, it does not provide specific data on diagnoses, procedures, and related charges.

Basic statistics on the utilization of physician and other services covered under the supplementary medical insurance program are derived from bills paid by intermediaries to or on behalf of a continuous 5-percent sample of all enrolled persons. Intermediaries have been given specific combinations of digits of the health insurance claim number to be used in selecting the 5-percent sample, which is a sub-sample of the 20-percent sample used for hospital insurance program data.

Bills are submitted either directly on an SSA request for payment form, or on the SSA form in combination with the physician's billing form. Both methods are designed to provide information on the date and place of each service, the procedure carried out or service provided, the condition treated (diagnosis), and the physician's or supplier's charge for the specific service.

All of the bills of persons in the 5-percent sample to or for whom payment is made under the program, including those used to meet the annual $50 deductible, are included in the sample and coded. However, data are not available through these procedures for persons in the sample who do not meet the $50 deductible. Such data are collected by means of the Current Medicare Survey, with data made available in a separate report series.[1]

For hospital-based physicians who have authorized the provider to collect the fee for their services, the provider billing for patient services by physicians form is used. This form is completed for each patient. It includes descriptive information on the date and place of each service, the diagnoses, procedures, and the charges. These bills are received centrally for the 5-percent sample of persons enrolled for supplementary medical insurance.

Characteristics of the Enrolled Population, 1970

On July 1, 1970, 20.4 million persons aged 65 and over were entitled to hospital insurance (HI) benefits under Medicare. Of this number, 19.6 million had voluntarily enrolled for supplementary medical insurance (SMI). This report presents data on the characteristics of the population in the Medicare program in 1970, and discusses changes in enrollment since the start of the program on July 1, 1966. The general tables present data by type of coverage, age, race, and sex, and by State and county of residence. Most of the counts of enrollees refer to July 1, 1970 in order to provide a population base for measures of utilization of medical care services under the Medicare program. Also included are tables showing enrollment by month, and the total number of persons enrolled at any time during 1970.

Almost all persons aged 65 and over are entitled to hospital insurance. The growth in the number of persons enrolled for HI—from 19.1 million in 1966 to 20.4 in 1970—reflected the excess of persons aging into the program over deaths of enrolled persons each year (table A). On the other hand, enrollment in the SMI program is voluntary and requires payment of a monthly premium by, or on behalf of, the beneficiary. When Medicare began, almost 1.4 million persons who were entitled to HI had not enrolled for SMI; by July 1, 1970, this group had decreased to about 900,000. In addition, 130,000 persons who were not eligible for HI had enrolled for SMI.

HI Enrollment

Type of entitlement.—Persons enrolled in the HI program may be described according to the characteristics recorded in the Health Insurance Entitlement

Table A.—Medicare enrollment and annual percent increase by type of coverage, July 1, 1966-70

Type of coverage	1966	1967	1968	1969	1970
	Enrollment, all persons (in thousands)

(HIE) master file--age, race, sex, place of residence, and type of entitlement. Nearly 92 percent of the persons entitled to HI benefits were receiving or were eligible for social security benefits (table B), and 4 percent were receiving or entitled to receive railroad retirement benefits. Some persons were entitled to both social security and railroad retirement cash benefits on the basis of earnings under both programs (306,000). These individuals are reported both as entitled to social security benefits and as entitled to railroad retirement benefits, but are counted only once in the figures in table B for all enrolled persons. The balance of the enrolled population (5.7 percent) were not receiving cash benefits under either social security or railroad retirement. This group is entitled to HI coverage under the transitional provisions of the law. Under this provision, persons attaining age 65 need not be fully insured for social security but must have a specified number of quarters of covered employment to be eligible for HI. For persons who reached their 65th birthday before 1968, no quarters of coverage were required; in 1968, 3 quarters; in 1969, 6; and in 1970, 9.

The number of persons classified as "other enrolled persons" in table B declined from 2.6 million on July 1, 1966 to 1.5 million on July 1, 1967, reflecting the transfer of persons who benefited from Public Law 89-368 (the Prouty Amendment) from the category "other enrolled persons" to "persons entitled to social security benefits." Under this provision of the law, effective October 1966, persons aged 72 or older before 1968 are entitled to a monthly cash benefit even though they earned no work credits. Persons attaining 72 years of age in 1968, 1969, and 1970 were required to have earned at least 3, 6, and 9 calendar quarters of work

See footnote at end of table.

credits respectively to obtain cash benefits. Since 1967, the number of "other enrolled persons" has decreased steadily to 1.2 million on July 1, 1970, because of the work requirement.

Except for the proportion of persons with race not reported, there are only minor differences between the characteristics of railroad retirement beneficiaries and social security beneficiaries (table B). Race was not reported for 17 percent of the railroad retirement beneficiaries in contrast to 1 percent for social security beneficiaries. Those persons classified as "other enrolled", however, had a high proportion (73 percent) of women, of persons 80 years and over (32 percent) and of persons reported as members of "all other races" (18 percent).

Age, race, and sex.—There were more women enrolled in HI than men at every age and the ratio of women to men increased with advancing age reflecting the greater longevity of women. At ages 65-66, 53 percent of the HI population were women. This proportion rose to 66 percent at ages 85 and over. The group for whom race was not reported combined disparate elements (see Race unknown). At ages 65-66, 40 percent were women, but this figure rose steeply to 87 percent at ages 85 and over.

By race, 89 percent of the enrolled population was classified as white; 8 percent as all other races; and for 3 percent race was not reported. The median age of the white population was 0.6 years higher than for all other races; and median age of women was 1 year higher than that of men:

[1] Persons entitled to social security and railroad retirement cash benefits (306,000) are counted in each category separately but only once in total.

Race and sex	Persons enrolled in HI (in thousands)	Percent	Median age
Total HI enrollees	20,361	100.0	73.1
Men	8,507	41.8	72.5
Women	11,855	58.2	73.5
White	18,187	89.3	73.1
Men	7,610	37.4	72.6
Women	10,577	51.9	73.4
All other races	1,608	7.9	72.5
Men	715	3.5	72.0
Women	894	4.4	72.9
Race unknown	566	2.8	75.5
Men	182	.9	69.4
Women	384	1.9	78.9

Geographic distribution.—For the HI population, the most populous region was the South (30 percent) while the West contained the smallest proportion (15 percent) of HI enrollees (table C). The greatest proportion of the HI population resided in the Middle Atlantic and the East North Central States, with each having nearly 20 percent of all HI enrollees. The Mountain States contained the smallest percentage of HI enrollees (4 percent).

With the exception of the South, the proportion of whites exceeded 91 percent of the HI enrollees in all geographic divisions. In the three divisions of the South, the white population varied between 79 and 84 percent of HI enrollees.

Almost two-thirds of the persons covered by hospital insurance reported their place of residence to be a metropolitan county. The percentage distribution by region and division for 1970 is:

Region and division	All persons	Metropolitan counties		Nonmetropolitan counties
		With central city	Without central city	
United States	100.0	51.7	12.5	35.7
Northeast	100.0	57.5	23.3	19.1
New England	100.0	55.6	22.9	21.4
Middle Atlantic	100.0	58.1	23.4	18.4
North Central	100.0	47.0	11.0	41.9
East North Central	100.0	55.3	12.3	32.3
West North Central	100.0	30.6	8.4	61.0

The proportion of those living in metropolitan counties showed considerable variation according to geographic area. By region, more than half the population of the South lived in nonmetropolitan counties but in the Northeast about 20 percent of the population lived in counties of this type. Three-quarters of the HI enrollees who lived in a metropolitan county resided in the standard metropolitan statistical areas having a population 500,000 or more in 1970 (table 2.4).

Table C.—Percentage distribution of persons in the hospital insurance program by region, division, and race, July 1, 1970

SMI Enrollment

Age, race, and sex.—There was little difference in the distribution by race, sex, and median age of persons enrolled under the HI and the SMI programs. This is to be expected since the number enrolled for SMI benefits was 96 percent of those entitled to HI coverage (table D). When Medicare began, only a small number of persons were eligible for SMI but not for HI (table A). The number of SMI enrollees expressed as a proportion of the number of HI enrollees, therefore, provided an adequate measure of participation in the voluntary part of the program. However, by 1970, with 130,000 persons enrolled in SMI but not eligible for HI, enrollment in both HI and SMI as a proportion of HI enrollment has been computed as a more accurate indicator of SMI coverage.

The proportion of the total HI population also enrolled in SMI, however, differed significantly between races. For the white population, 96 percent of the persons enrolled for HI were also enrolled for SMI, about 6 percentage points more than for all other races. The excess for whites persisted in every age and sex group. The percentage of HI enrollees also covered by SMI varied only slightly with sex, the participation of women being greater than that of men by about one percentage point. For 2-year age groups between 65 and 75 the lowest proportion was recorded for men at ages 65 and 66. It is likely that many men on attaining age 65 do not enroll for SMI because they are protected by employment-related medical insurance. By 5-year age groups the lowest and highest participation rates differed by only 1 percentage point.

Geographic distribution.—On July 1, 1970, among HI enrollees residing in the United States, 97 percent were also enrolled in SMI (table E), about 1 percentage point higher than for all persons covered by HI. The lower rate among the total population resulted from the inclusion of two groups of SMI-eligible persons with low participation residing in outlying areas such as Puerto Rico (see table 2.1) and in foreign countries. Persons 65 years and over living in foreign countries may not ordinarily be paid Medicare benefits for services furnished in those countries. Participation rates were much lower than the U.S. average in every outlying area. Factors such as lower incomes and differing arrangements for medical care in these areas probably account for the lower enrollment.

For all persons in the United States, the percent of HI enrollees with SMI benefit coverage varied only about 1 percentage point among the divisions, from 96 percent in the South Atlantic, and West South Central States to 97 percent in the New England States. Among all other races this proportion varied by 11 percentage points from 84 percent in the Mountain States to 95 percent in the Pacific States. There were only slight differences in the proportion of HI enrollees with SMI coverage according to metropolitan-nonmetropolitan county of residence.

Persons Newly Enrolled, and Terminated in 1970

A total of 1,465,000 persons was newly enrolled under HI during 1970 (table F), an average of 122,000 a month. Nearly all additions to the rolls were persons who had just attained age 65. The provisions of the law for HI coverage also permit additions to the rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for

[1] PA recipients entitled to OASDHI and RRB were covered under State "buy-in" agreements, except in Mass. and Wis. Coverage was effective July 1, 1966, except in Calif. and Guam where coverage of beneficiaries began Jan. 1, 1967, and July 1, 1968, respectively.

[2] Definition of title number: 1—old-age assistance; 4—aid to families with dependent children; 10—aid to the blind; 14—aid to permanently and totally disabled; and 16—aid to aged, blind, or disabled.

[3] Title 4 covered in Ark. effective Jan. 1, 1970; Fla., Feb. 1, 1970; Maine, Apr. 1, 1968; and Okla., No. 1, 1967.

[4] Titles 4, 10, and 14 covered in Del. effective May 1, 1968; Iowa, July 1, 1967; N.J., Jan. 1, Nov. 1, 1970; S. Dak., Jan. 1, 1968; Tenn., Dec. 1, 1969; Va., Sept. 1, 1969; and Wis., Apr. 1, 1968.

up to 12 months prior to the date he filed his application. Additions to the SMI program totaled 1,598,000 persons, exceeding the number of those newly enrolled for HI by 130,000 persons. Additions to the SMI rolls were higher than for HI as a result of three factors--the general enrollment period, the State buy-in program and the enrollment of persons in SMI who are ineligible for HI coverage.

The general enrollment period.—Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods (see Provisions of the Law). In the general enrollment period (GEP) which ran from January 1, 1970 to March 31, 1970 about 310,000 persons were identified as eligible to enroll. About 140,000 chose to do so with enrollment taking effect on July 1, 1970.

The premium paid by persons enrolling for SMI was $5.30 a month on July 1, 1970. In addition, the monthly premium of persons who do not sign up in their initial enrollment period is increased by 10 percent for each full 12 months in which they could have but did not enroll. The increase also applies to persons re-enrolling 12 or more months after their first coverage was terminated. About 61 percent of those who enrolled during the 1970 GEP were subject to a 10 to 30 percent surcharge, or premium payments ranging from $5.80 to $6.90 a month.

State "buy-in" agreements.—Part of the rise in SMI enrollment resulting from the "buy-in" provisions of the law. At the start of Medicare, 22 States elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90-248 extended eligibility effective April 1, 1968, to those who qualify for medical assistance programs. By January 1, 1970, the closing date for requesting this arrangement, 46 States, the District of Columbia, Guam, and the Virgin Islands had signed buy-in agreements for particular categories to public assistance recipients (table G). Six States had coverage which became effectivee in 1970: Alabama, Hawaii, Mississippi, New Mexico, and North Carolina effective on January 1; and Maryland effective July 1, 1970. During 1970, over 2,360,000 or 11 percent of all SMI enrollees, were enrolled in the program under welfare buy-in agreements (table H). The highest proportions of buy-ins in the United States were in Alabama, Mississippi, Georgia, Arkansas, Texas, and Oklahoma where the States each paid the premiums for more than one-quarter of their SMI enrollees.

"SMI only" enrollees.—The third group adding to SMI enrollment are those persons ineligible for HI coverage. There were 130,000 such persons on July 1, 1970, an increase of 42,000 persons since July 1, 1969. They were persons who lacked the required work credits for HI eligibility, estimated to number 100,000, and

Men	5	3	1	-	4	1	-
Women	11	7	3	-	10	-	-
Race unknown	16	10	3	1	14	1	1
Men	4	2	1	-	3	1	-
Women	12	8	3	-	11	1	-

Persons terminated.—During 1970, HI coverage was terminated for 1,186,000 persons who died (table J). Since termination of coverage occurs in the month after death, terminations in 1970 include deaths in the months of December 1969 through November 1970.

In calendar year 1970, 1,185,000 deaths were recorded among Medicare (HI and/or SMI) enrollees. Owing to differences in the population covered, and in the sources of the report of age at death as well as delays in recording deaths in the Social Security Administration's file, these figures do not correspond exactly to data on deaths published by the National Center for Health Statistics.

Nearly 1,189,000 persons were terminated from SMI in 1970, 96 percent as a result of death. Only 46,000 of the 19.6 million persons enrolled for SMI withdrew from the program either by notifying the Social Security Administration or by not paying the premium. While over 96 percent of the terminations for white persons were a result of death, 90 percent of the terminations for all other races resulted from death and the remaining 10 percent withdrew.

Enrollment Growth 1966-1970

Enrollment in Medicare has increased each year the program has been in existence. HI enrollment increased from 19.1 million persons in 1966 to 20.4 million in 1970 as a result of the increasing numbers of persons attaining age 65. This number exceeds terminations, all of which are deaths. As previously observed, only a small percentage of persons aged 65 and over are not enrolled in HI—these are persons lacking the required work credits for coverage or federal employees insured under the Federal Health Benefits Act of 1959. SMI, in contrast, is a voluntary program and increases in enrollment depend upon the proportion of the population for which the monthly premium is paid. SMI enrollment increased from 17.7 million in 1966 to 19.6 million in 1970; however, the growth pattern differed considerably from that observed for HI. Annual increases in HI enrollment varied between 1.2 and 2.2 percent but for SMI the range was 0.9 to 5.1 percent (table A). The smallest increase (0.9 percent) occurred between 1966 and 1967 while the 5.1 percent increase occurred between 1967 and 19968, when enrollment in the first GEP became effective on July 1, 1968.

Table J.—Persons whose health insurance was terminated during 1970 by race, sex, and reason for termination

Race and sex	Terminated by death			Other supplementary medical insurance terminations
	Hospital and/or medical insurance	Hospital insurance	Supplementary medical insurance	
All persons	1,189,597	1,186,048	1,142,842	45,933

Women	29,935	29,699	28,639	2,287

493-492 O - 73 - 3

Hospital insurance.—As the enrolled population grew between 1966 and 1970, its characteristics changed slightly. The enrollment of women has increased at a rate of nearly twice that for men (table K) and as a result the proportion of the population represented by

Table K.—Hospital insurance enrollment: Annual percent increase by age, sex, race, and area of residence, 1966-70

Age, sex, race, and area of residence	1967	1968	1969	1970
Total enrollment	2.2	1.4	1.2	1.7
Age:				
Under 75	1.0	.4	.3	1.0
75 and over	4.0	3.2	2.7	2.9
Sex:

West North Central	1.4	.8	.4	.8
South	3.4	2.0	2.0	2.7
South Atlantic	3.9	2.3	2.6	3.4
East South Central	2.5	1.4	1.1	1.9
West South Central	3.1	1.8	1.6	2.3
West	2.9	2.0	2.1	2.4
Mountain	3.4	2.2	2.8	3.2
Pacific	2.7	2.0	1.9	2.2

women slowly but steadily increased from 57.4 percent in 1966 to 58.2 perccent in 1970, as shown below:

Year	Men	Women
1966	42.6	57.4
1967	42.3	57.7
1968	42.1	58.0
1969	42.0	58.0
1970	41.8	58.2

By race, for the period 1966-1970 the percentage increase of persons of all other races at ages 65 and over was about 1.7 times that for white persons. As a result, the proportion of all other races in the HI population increased to 7.9 percent in 1970 while relatively, the white population remained about the same:

Year	All persons	White	All other races	Race unknown
1966	100.0	89.3	7.6	3.1
1967	100.0	89.2	7.7	3.1
1968	100.0	89.2	7.7	3.1
1969	100.0	89.2	7.8	3.0
1970	100.0	89.3	7.9	2.8

The increase in enrollment among women was much larger than that of men for both white persons and those of all other races. The annual growth in enrollment between 1966 and 1970 for persons aged 65-74 was 1 percent or less per year, with a slightly larger percentage growth for women than for men. For persons aged 75 and over the percentage increase in enrollment was 2.7 percent or greater for each year, increasing their proportion of the HI population to 39.5 percent in 1970 compared with 37.2 percent in 1966:

Year	65-74	75 and over
1966	62.8	37.2
1967	62.2	37.8
1968	61.5	38.5
1969	60.9	39.1
1970	60.5	39.5

In the 75 and older age group, the percentage increase in HI enrollment of women was nearly double that of men, reflecting the greater longevity of women. Most of the growth in the enrollment of men in the HI population also occurred in the 75 and over age group which experienced an average annual increase in enrollment of slightly over 2 percent compared to only about 0.5 percent increase per year for men 65-74 years of age.

Growth in enrollment by geographic division depends upon the aging of the resident population, the number of deaths, and in addition, on the migration of persons 65 and over. During the period July 1, 1966 to July 1, 1970 average annual increases in enrollment exceeded 2 percent for the South and the West, but were less than 1 percent for the Northeastern and North Central States. Enrollment in the South increased by 565,000 persons between 1966 and 1970, nearly 46 percent of the increase for the entire United States. Beginning in 1968, HI enrollment in the South surpassed that for the North Central States, to become the most populous of the four regions. The large increase in enrollment in Florida (23 percent) between

1966 and 1970 was chiefly responsible for the population growth in the South. With one exception, HI enrollment between July 1, 1966 and July 1, 1970 increased in every State in the country. The District of Columbia experienced a 2 percent decline. The distributions of changes by State are shown below:

Percentage change in enrollment, 1966-70	Number of States[1]	
	Hospital insurance	Supplementary medical insurance
Total	51	51
-5.0 to 0.0	1	-
0.0 to 4.9	19	3
5.0 to 9.9	22	22
10.0 to 14.9	3	14
15.0 to 19.9	3	5
20.0 to 24.9	2	4
25.0 to 29.9	1	2
30.0 to 34.9	-	1

[1] Includes District of Columbia.

The largest relative gains in enrollment between 1966 and 1970 occurred in Nevada, Arizona, and Florida; and the smallest in Iowa and Massachusetts. A large proportion of the rise in HI population between 1966 and 1970 occurred in metropolitan counties (8 percent). Relatively, the increase for metropolitan counties was more than twice that for nonmetropolitan counties. Some of the increase for metropolitan counties resulted from improvements in allocating addresses, which reduced the number of persons for whom county of residence was unknown from 90,000 to 20,000.

Changes in SMI enrollment.—The increase in enrollment in SMI for the period 1966-1970 was 1½ times greater than for HI. As a result the proportion of the HI population also enrolled in SMI increased from 92.8 percent in 1966 to 95.5 percent in 1970. This ratio declined in 1967 because there was no open enrollment. When the first GEP became effective on July 1, 1968, there was a 5 percent increase in SMI enrollment, followed by 2 percent in 1969 and in 1970 (table L).

Enrollment in SMI declined for persons of all other races between 1966 and 1967, but since then the annual percentage increase for this group has been nearly twice that for white persons. The proportion of white enrollees with SMI protection decreased in 1967 to 92.6 but has increased to 96.1 in 1970. In 1967, only 83.1 percent of HI enrollees of all other races were also participating in SMI; but in the last 3 years this figure has steadily increased, reaching 90.6 in 1970.

The growth in enrollment in SMI by area of residence from 1966 to 1970 was similar in pattern to the HI enrollment growth.

Table L.—Supplementary medical insurance enrollment: Annual percent increase by age, sex, race, and area of residence, 1966-70

Source of Data

The HIE master file.—The data on age, sex, race and place of residence of the enrolled population in this report are from the health insurance entitlement (HIE) master file. Changes or corrections in the characteristics of the beneficiaries, new enrollments and terminations are entered into the file at periodic intervals. Data for 1970 are from the HIE master file summarized on March 31, 1971.

Place of residence.—The beneficiary's place of residence is defined as his mailing address. This mailing address is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary. Temporary or permanent changes in address

are shown as enrollees report them to SSA. Only the current mailing address is kept in the HIE master file and that address is classified as the place of residence. The address in the file on the date of tabulation is used for all tables.

Residence unknown.—There were nearly 10,000 people with unknown residence recorded in the HIE file in 1970 (table 2.6). Most of these entries were the result of processing errors with respect to codes for States or foreign countries. In addition, the number of enrollees whose county of residence was unknown appears in table 2.3 for each State. These were addresses from which the county could not be determined or possibly, processing errors.

Race unknown.—On July 1, 1970 the number of HI enrollees without a race designation was 566,000, a decrease of 31,000 from the previous year. The number of women classified as race unknown decreased by 42,000, principally as a result of race data obtained from a matching of RRB records with SSA records. The number of men for whom race was unknown increased by 12,000 for the most part because of unresolved data exchange procedures between the SSA and the Railroad Retirement Board. The master records of the Board do not contain a race designation. At the start of the Medicare program and at the request of the SSA, the Board provided Medicare with race information. Since then no race information has been obtained for railroad retirement beneficiaries newly enrolled in the Medicare program. The changes by type of entitlement of HI enrollees classified as "race unknown" between 1969 and 1970 are shown in the next column.

Persons enrolled as of July 1, 1970.—Enrollment data as of July 1 have been chosen as the population base for utilization rates to be published in other sections of the annual statistical report series. The choice was based on similarity of July 1 enrollment to a 12-month average enrollment. A comparison of HI enrollment by age, race, and sex on July 1, 1970 with an average of 12 monthly enrollment figures in 1970, computed from table 2.5, showed remarkable similarity. Less satisfactory was SMI enrollment for July, which was consistently higher than the 12 month average enrollment. This difference resulted from additions to the rolls on July 1 of persons who requested coverage during the general enrollment period. However, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled since enrollment data are less complete in the months closest to the date of tabulation. The difference between the July 1 figure and the "true" monthly average may be less than that observed in the present data.

[In thousands]

Type of entitlement and sex	HI enrollment		Increase, 1969-70
	1969	1970	
Total race unknown[1]	597	566	-31

Women	152	142	-10

[1] Persons entitled to social security and railroad retirement benefits are counted in each category separately, but only once in the total.

PROVISIONS OF THE LAW

The health insurance program for the aged, commonly called Medicare, was enacted on July 30, 1965 as Title XVIII of the Social Security Act, and became effective on July 1, 1966. The program makes available two separate but coordinated insurance coverages —hospital insurance, covering nearly all persons aged 65 and over, and supplementary medical insurance, covering those persons in this age group who enroll voluntarily and pay the premium.

Hospital Insurance Program

The hospital insurance program (Part A of Medicare) pays for part of the costs of inpatient hospital and related post-hospital services. It is financed on a self-supporting basis through a tax on a portion of current earnings, paid by employees, employers, and self-employed persons. The proceeds of this tax are placed in the Hospital Insurance Trust Fund for payment of benefits and administrative expenses incurred under the program. General tax revenues are used to defray the costs of providing coverage for persons who qualify for hospital insurance but who are not eligible for monthly social security or railroad retirement benefits.

BENEFITS

Inpatient hospital benefits.—The program pays for up to 90 days of covered services in a participating hospital in a "benefit period" (a period beginning with the first day of hospitalization and ending 60 days after discharge from a hospital or a skilled nursing home). Full payment is made for the first 60 days of hospitalization after a deductible of $52 has been paid. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of $13 a day.

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days, subject to a copayment of $26 a day. These additional days can be used at the patient's option whenever the 90 days covered in a benefit period are exhausted.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services elects whether to bill the program or to charge its patients directly. If they bill the program, they are reimbursed on the basis of reasonable costs of covered services rendered. If they bill the patient, he pays the bill and submits the itemized bill to SSA for reimbursement. The reimbursement paid is 60 percent of reasonable charges for room and board and 80 percent of the charges for ancillary services.

Inpatient tuberculosis and psychiatric hospital services are also covered. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a participating psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period immediately prior to his eligibility are deducted from his days of entitlement in that benefit period but not from the lifetime limitation.

Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private-duty nursing), drugs and biologicals, and all those services ordinarily furnished by a hospital to its inpatients. The hospital insurance program does not cover the services of physicians (including radiologists, anesthesiologists, pathologists and physiatrists) except for services provided by interns or residents in training under approved teaching programs in a hospital.

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program.

Post-hospital home health care benefits.—These benefits cover the cost of visiting nurse services and related home health services for as many as 100 visits in the year following the patient's most recent discharge from a hospital or participating extended care facility, provided he has been confined for at least 3 consecutive days in a hospital. A home health plan must be developed by a physician and implemented within 14 days after the patient's discharge from the hospital or extended care facility. The home health care must be for further treatment of a condition for which he received services in the hospital or extended care facility.

Extended care facility benefits.—The program pays for the reasonable cost of all covered inpatient services in participating extended care facilities (ECF) for up to 100 days in any benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more, and admission to an ECF within 14 days of discharge. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of $6.50 a day. (The extended care coinsur-

ance amount is set by law as one-eighth of the inpatient hospital deductible.)

Supplementary Medical Insurance Program

The supplementary medical insurance program (Part B of Medicare) covers physicians' services, outpatient hospital services, additional home health services, other medical services and supplies, and outpatient physical therapy. Individuals 65 years of age and over may enroll in the program regardless of whether they are eligible for social security retirement benefits by paying monthly premiums which are matched by the Federal Government and paid into the Supplementary Medical Insurance Trust Fund for payment of benefits and administrative expenses incurred under the program.

BENEFITS

The SMI program pays for 80 percent of the allowed charges for covered physician services and other medical services after the patient has met a deductible of $50 during a calendar year. For outpatient care and home health services, the program pays 80 percent of reasonable costs after the deductible has been met. Payment for outpatient psychiatric physician services is limited to the lesser of $250 or 50 percent of the allowed charges in any year after the $50 deductible has been met. The sum and percentage are derived from the statutory provision which permits an incurred expense for out-of-hospital treatment of mental illness of only $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges can be reimbursed, the effective maximum becomes $250.

To preclude the possibility of having to meet a deductible twice in a short period of time, a "carryover" provision is applied. Accordingly, covered expenses that are incurred in the last quarter of the year and counted toward the deductible in that year are also credited toward the deductible for the following year. However, the provisions concerning the deductible and the coinsurance do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are completely reimbursed.

The SMI program pays for physicians' services, including home, hospital, and office visits; services and supplies, including drugs and biologicals that cannot be self-administered, that are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-ray; radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment, including iron lungs, oxygen tents, hospital beds, and wheelchairs used in the patient's home (including an institution used as his home); ambulance service where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an internal organ; leg, arm, back, and neck braces; artificial legs, arms, and eyes, including replacement if required because of a change in the patient's physical condition; and 100 home health visits during a calendar year, independent of those provided under the hospital insurance program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient physical therapy services.

Eligibility

The hospital insurance program.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons in this age group who are entitled to monthly social security cash benefits or payments from the railroad retirement system, regardless of whether they have applied for these cash benefits. During 1970, a person could apply for hospital insurance protection even though he did not qualify for either social security cash benefits or a railroad retirement annuity if (1) he had attained age 65 before 1968, or (2) he would attain age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he would attain age 65. However, hospital insurance protection could not go into effect until the individual attained age 65. These two classes of individuals were "deemed insured" under a special transitional provision.

For persons who reach age 65 after 1968, the amount of work credits needed increases by three quarters each year—six quarters are needed by those who reached age 65 in 1969, nine by those who reach 65 in 1970, and so on. However, a person who qualifies for monthly benefits as the dependent or survivor of an insured worker does not need any work credits.

Employees who retired from the Federal Civil Service after July 1, 1960, and who had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions. Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Hospital insurance protection can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Supplementary medical insurance.—Persons entitled to benefits under the hospital insurance program (Part A), retired Federal employees and persons not eligible for hospital insurance under the transitional provisions may voluntarily participate in the SMI program.

Enrollment.—Individuals may enroll in the SMI program only during specified periods—the initial and the general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual attains age 65 and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he attains age 65, his coverage is effective with the month in which he attains age 65; if he enrolls during the month he attains age 65, his coverage begins the following month; if he enrolls in any of the 3 months after he attains age 65, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

The most recent general enrollment period was set between January 1, 1970, and March 31, 1970, for those who did not enroll in their initial enrollment period, or who having terminated their enrollment now wished to reenroll. Comparable periods are set to occur in every year. A person who enrolls during a general enrollment period may receive benefits starting on the first of July following the general enrollment period. An eligible individual must enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment.

A State may enroll otherwise eligible individuals who receive cash payments under public assistance programs if the State requests that a State-Federal enrollment agreement be established and pays the necessary premiums.

Enrollment terminates with the beginning of the month following the month of death. Up to April 1, 1968, railroad retirement beneficiaries and individuals entitled to monthly cash social security benefits could terminate their enrollment voluntarily by notifying the Social Security Administration in writing during a general enrollment period of the desire to withdraw from the program. Under the 1967 amendments effective April 1, 1968, beneficiaries may give notice of withdrawal at any time and their coverage will be terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of the desire to withdraw from the program. The enrollee is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated. An individual who previously has terminated his enrollment may reenroll only in a general enrollment period beginning within 3 years of the date his previous enrollment had terminated. Reenrollment, however, is allowed only once.

Financing the Program

Hospital insurance.—The hospital insurance program is financed on a long-range, self-supporting basis through a separate schedule of increasing tax rates on the first $7,800 of earnings in employment covered under the Social Security Act. The same tax rate applies to employees, employers, and self-employed persons. This rate was 0.60 percent for 1968–1972, and is scheduled to increase until it is 0.90 percent in 1987 and thereafter. The proceeds of this tax and that collected from the railroad retirement system are placed in a Hospital Insurance Trust Fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The Hospital Insurance Trust Fund is reimbursed from general tax revenues for the cost of providing coverage for the almost 2½ million persons who qualify for hospital insurance under the transitional provisions.

Supplementary medical insurance.—Premiums are paid into the Supplementary Medical Insurance Trust Fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching amount is paid from general revenues by the Federal Government.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal civil service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. Premiums may be paid for as long as a year in advance, and for individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

The monthly premium during 1969 and the first half of 1970 was $4 a month. The premium rate of the supplementary medical insurance program may be adjusted annually if medical costs rise. Beginning July 1970, it was raised to $5.30 a month.

As previously noted, States are permitted to pay the medical insurance premiums for public assistance recipients aged 65 or over who were receiving money payments under an approved public assistance plan and for all aged persons eligible to receive medical assistance under an approved Title XIX plan.

Administration of the Program

Hospital insurance.—Under the hospital insurance plan, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its

association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. The intermediary makes payments to providers for covered items and services on the basis of reasonable cost determinations and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services, (2) serving as a center for communicating with providers, and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Requests for payment for covered services must be signed by the beneficiary (or someone for him, if he is unable to do so). Payments are made on the basis of reasonable costs for these services to participating providers of services, that is, hospitals, extended care facilities, and home health agencies, that have been certified for participation.

In some instances, hospitals may bill for physician services rendered to inpatients. In these cases, payment is made by the Part A intermediary. Depending on the nature of the billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services, or are paid directly from the SMI trust fund.

The intermediary selected by the provider reviews the claims for payment and pays the provider. Actual payment is made on the basis of an interim rate established between the provider and the intermediary. Final settlement based on each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payments can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary medical insurance.—Under the medical insurance program, the Secretary may enter into contracts with carriers for the performance of specified administrative functions. The carriers' principal function is to determine whether charges are allowable (reasonable) and to make payment.

The carrier selected by the Secretary determines the allowed charges for bills submitted for each medical care service covered by the program and pays 80 percent of this amount after the $50 deductible has been met.

The allowed charge for the service may be paid to the patient, or the patient may assign the bill for collection to the physician or other supplier of the service, if he is willing to accept assignment. In the former situation, the patient submits an itemized bill to the carrier and is reimbursed; in the latter, the physician or other supplier submits the bill and is reimbursed. When the payment is made directly to the physician (or supplier) on assignment, the allowed or reasonable charge determined by the carrier is the total charge. In both situations, the patient is responsible for the first $50 of the charges for covered services he receives during the year and the amount of the bill over 80 percent of the allowed charges.

The law instructs the carrier to consider the following criteria in determining the "allowed" charge:

(1) the customary charge for the service generally made by the physician or other person furnishing such services; and

(2) the prevailing charge in the locality by other physicians and suppliers for similar services. The upper limit of the prevailing charge was set at the 83d percentile of the weighted customary charge.

The law also specifies that the "allowed" charge cannot be higher than the charge applicable for the similar service rendered under comparable circumstances to the carriers' own policy holders or subscribers. For 1970, carriers were instructed to maintain allowed charges at the levels existing before 1969.

Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against unncessary utilization of services furnished eligible individuals.

Most services covered by the medical insurance program are rendered on a fee-for-service basis. However, services furnished under group practice prepayment plans are normally rendered in return for predetermined premium payments. In recognition of the need for special adaptation of the Medicare payment procedures for services rendered by group practice prepayment plans, the law provides that an organization which furnishes medical and other health services (or arranges for their availability) on a prepayment basis, may elect to be paid 80 percent of the reasonable cost of services in lieu of 80 percent of the allowed charge for such services.

The 1967 amendments to the Social Security Act introduced a time limit on filing of claims. For bills incurred in the supplementary medical insurance portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

General Tables

Notes

Health insurance for the aged.—The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over.

Type of coverage.—The program provides two types of insurance: a basic hospital insurance plan (HI) and a voluntary supplementary medical insurance plan (SMI).

Personal characteristics:

Age: In completed years at last birthday on the reference month of the table. A person is considered to have attained age 65 on the day preceding his 65th birthday.

Race: White, all other races, or unknown as entered into the HIE master file from basic records completed by the primary beneficiary. Race unknown whether or not specifically indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for an SMSA if either of the following pertains: (1) there were 10,000 or more enrollees of all other races in the area in the hospital insurance program on July 1, 1970 or (2) at least 10 percent of enrollees in the area covered under the hospital insurance program were enrollees of all other races.

Sex: As designated in the HIE master file.

Persons ever enrolled: All persons eligible for benefits at any time during 1970.

Geographic classifications: Based on the address to which the enrollee's cash benefit check is being mailed or the mailing address recorded in the HIE master file on March 31, 1971, regardless of the reference date of the table.

All areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States: Consists of the 50 States, the District of Columbia and residence unknown.

Other outlying areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

[1] Bureau of the Budget, Standard Metropolitan Statistical Areas (Washington, D.C.: U.S. Government Printing Office, 1967).

County.—The primary divisions of the 50 States are counties. In Louisiana, however, the divisions are known as parishes. Alaska is divided into 21 economic areas, included here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada, and Virginia. Beginning with this report, data are shown separately for Bedford City, Virginia, which became independent of Bedford County on September 1, 1968 and Carson City, Nevada which became consolidated with Ormsby County to form an independent city on July 1, 1969. Also beginning with 1970, Yellowstone Park County in Wyoming has been deleted and its territory included in Park and Teton Counties. In Puerto Rico divisions are called municipios.

County unknown.—Persons whose mailing address does not permit identification of county of residence are included in figures for States, but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's, with one exception. Where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties.—The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as classified by the Bureau of the Budget.[1] Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIE master file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

SMSA, metropolitan SEA.—See above. Only areas in the United States are listed.

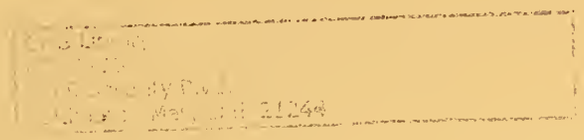
U. S. GOVERNMENT PRINTING OFFICE : 1973 O - 493-492



Other Data Sources on the Health Insurance for the Aged Program

The *Health Insurance Statistics* series is designed to present current, quick-release data from the Medicare program. Two report series are issued in this format:

The Health Insurance (HI) series has included numerous releases since 1967. Issues released prior to 1970 are out of print, but available in many libraries.

The Current Medicare Survey (CMS) series, based on data from the continuing Current Medicare Survey, has included numerous releases since 1967. These issues are available in most libraries.

Future releases in the HI and CMS series may be obtained upon request to the Publications Staff, Office of Research and Statistics, Social Security Administration, Room 1120, Universal North Building, 1875 Connecticut Avenue, N.W., Washington, D.C. 20009.

The *Social Security Bulletin*, published monthly, presents authoritative articles and analyses of medical care expenditures, prices, and utilization as well as current operating statistics from the Medicare program. The *Annual Statistical Supplement* to the *Bulletin* includes summary data on trust funds, services, claims, enrollment, average charges and participating providers of service under Medicare. The *Bulletin*, including the *Supplement* is available in most libraries and by subscription at $4 a year from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The *Research and Statistics Note* series report on-going research, preliminary findings or provide addenda to material already published on the old-age, survivors, disability, and health insurance program. Designed to get information quickly into the hands of users, the series includes data on medical care prices, outlays, and expenditures. The series is available in many libraries. Future releases may be obtained upon request to the Publications Staff, Office of Research and Statistics, Social Security Administration, Room 1120, Universal North Building, 1875 Connecticut Avenue, N.W., Washington, D.C. 20009.
